CONTENTS OF VOLUME 35

Number 1

Cells in focus

Duncan F. Rogers 1 The airway goblet cell

Medicine in focus

Alfred Ayala, Joanne L. Lomas, Patricia S. Grutkoski and Chun-Shiang Chung 7 Pathological aspects of apoptosis in severe sepsis and shock?

Molecules in focus

Fumio Arisaka, Shuji Kanamaru, Petr Leiman and Michael G. Rossmann 16 The tail lysozyme complex of bacteriophage T4

Reviews

Ramareddy V. Guntaka, Balwantkumar R. Varma and Karl T. Weber 22 Triplex-forming oligonucleotides as modulators of gene expression

Kenneth R. Cutroneo and Jen-Fu Chiu 32 Sense oligonucleotide competition for gene promoter binding and activation

General articles

Bernhard Wehrle-Haller and Beat A. Imhof 39 Actin, microtubules and focal adhesion dynamics during cell migration

Susan J. Hemmings and Satchan Takaya 51 Sucrose feeding effects inhibition of γ-glutamyltranspeptidase in the liver of the rat: possible mediation by thyroid hormone

F. Javier Arias, Pilar Antolín, Carlos de Torre, Begoña Barriuso, Rosario Iglesias, M. Angeles Rojo, J. Miguel Ferreras, Eugenio Benvenuto, Enrique Méndez and Tomás Girbés 61 Musarmins: three single-chain ribosome-inactivating protein isoforms from bulbs of *Muscari armeniacum* L. and Miller

Ying-yi Xiao, Michael A. Beilstein, Mei-chuan Wang, Juntipa Purintrapiban and Neil E. Forsberg 79 Development of a ponasterone A-inducible gene expression system for application in cultured skeletal muscle cells

Aya Kurosawa, Ken-ichi Shinohara, Fumiaki Watanabe, Keiko Shimizu-Saito, Osamu Koiwai, Kohtaro Yamamoto and Hirobumi Teraoka 86 Human neutrophils isolated from peripheral blood contain Ku protein but not DNA-dependent protein kinase

Ling-Hui Zhang, De-Pei Liu and Chih-Chuan Liang 95 Finding regulatory sequences

Teresa Mulet, Catalina Picó, Paula Oliver and Andreu Palou 104 Blood leptin homeostasis: sex-associated differences in circulating leptin levels in rats are independent of tissue leptin expression

111 Book reviews

Number 2

Cells in focus

Patricia M. Taylor, Puspa Batten, Nigel J. Brand, Penny S. Thomas and Magdi H. Yacoub 113 The cardiac valve interstitial cell

Medicine in focus

Uli Schmidt and C. Glenn Begley 119 Cancer diagnosis and microarrays

Molecules in focus

Lars-Åke Fransson 125 Glypicans

Juha-Pekka Himanen and Dimitar B. Nikolov 130 Eph receptors and ephrins

Review

Bruno Sangro, Maite Herraiz and Jesus Prieto 135 Gene therapy of neoplastic liver diseases

Short communication

Thomas Koeck and Karl Kremser 149 L-Carnitine alters nitric oxide synthase activity in fibroblasts depending on the peroxisomal status

General articles

Sung Joon Ahn and In Kook Park 157 The coenzyme thiamine pyrophosphate inhibits the self-splicing of the group I intron

Sung-Hee Park, Jung Han Yoon Park, Jung-Sook Kang and Young-Hee Kang 168 Involvement of transcription factors in plasma HDL protection against TNF-α-induced vascular cell adhesion molecule-1 expression

Estrella Núñez-Delicado, Mar Sojo, Francisco García-Carmona and Alvaro Sánchez-Ferrer 183 Anomalous oxidation of MDL 73,404 by horseradish peroxidase

Pirkko J. Pussinen, Jari Metso, Ritva Keva, Birgit Hirschmugl, Wolfgang Sattler, Matti Jauhiainen and Ernst Malle 192 Plasma phospholipid transfer protein-mediated reactions are impaired by hypochlorite-modification of high density lipoprotein

Marek Tchórzewski, Dawid Krokowski, Wojciech Rzeski, Olaf-Georg Issinger and Nikodem Grankowski 203 The subcellular distribution of the human ribosomal "stalk" components: P1, P2 and P0 proteins

Eva Urbánková, Petr Hanák, Eva Škobisová, Michal Růžička and Petr Ježek 212 Substitutional mutations in the uncoupling protein-specific sequences of mitochondrial uncoupling protein UCP1 lead to the reduction of fatty acid-induced H^+ uniport

Justin P. Ludeman, Robert N. Pike, Karen M. Bromfield, Peter J. Duggan, Julia Cianci, Bernard Le Bonniec, James C. Whisstock and Stephen P. Bottomley 221 Determination of the P'_1, P'_2 and P'_3 subsite-specificity of factor Xa

Haipeng Cheng, Qi Gao, Min Jiang, Yushu Ma, Xiaohua Ni, Lingchen Guo, Wei Jin, Gentao Cao, Chaoneng Ji, Kang Ying, Weiwen Xu, Shaohua Gu, Yuhong Ma, Yi Xie and Yumin Mao 226 Molecular cloning and characterization of a novel human protein phosphatase, LMW-DSP3

Areta Pankiewicz, Tomasz Sledzinski, Anna Nogalska and Julian Swierczynski 235 Tissue specific, sex and age—related differences in the 6-phosphogluconate dehydrogenase gene expression

Christophe Frippiat, José Remacle and Olivier Toussaint 246 Down-regulation and decreased activity of cyclin-dependent kinase 2 in H_2O_2-induced premature senescence

Won-Kyo Jung, Pyo-Jam Park and Se-Kwon Kim 255 Purification and characterization of a new lectin from the hard roe of skipjack tuna, *Katsuwonus pelamis*

Number 3

Cells in focus

Stewart Sell 267 The hepatocyte: heterogeneity and plasticity of liver cells

Yassine Amrani and Reynold A. Panettieri 272 Airway smooth muscle: contraction and beyond

Medicine in focus

Peter Hewins and Caroline Savage 277 Anti-neutrophil cytoplasm antibody associated vasculitis

Elizabeth J. Soilleux and Nicholas Coleman 283 Transplacental transmission of HIV: a potential role for HIV binding lectins

Molecules in focus

Paul A. Sharp 288 Ctr1 and its role in body copper homeostasis

Debbie Trinder and Erica Baker 292 Transferrin receptor 2: a new molecule in iron metabolism

Review

Paul G. Besant, Eiling Tan and Paul V. Attwood 297 Mammalian protein histidine kinases

Short communication

Bing-Sheng Liu, Ning Wang, Xiao-Kuan Cheng, Ning-Hua Wu and Yu-Fei Shen 310 Differential hypersensitivity to DNase I in the regulatory region of human *hsp90*β gene in heat shock and constitutive expression

General articles

Lorenza Tacchini, Daniela Fusar-Poli, Marina Sironi, Alberto Mantovani and Aldo Bernelli-Zazzera 316 Activation of signal transducer and activator of transcription 3 in rat liver after heat shock and reperfusion stress

M.T. Abdel-Aziz, M.F. El-Asmar, Dawlat El-Miligy, Hazem Atta, Olfat Shaker, Maivel H. Ghattas, Hanan Hosni and Nagwa Kamal 324 Retrovirus-mediated human heme oxygenase-1 (*HO-1*) gene transfer into rat endothelial cells: the effect of HO-1 inducers on the expression of cytokines

Krzysztof Gwoździński, Anna Pieniążek and Wiesaw Kaca 333 Lipopolysaccharide from *Proteus mirabilis* O29 induces changes in red blood cell membrane lipids and proteins

Zhiyu Wang and Michelle Kurpakus-Wheater 339 Decreased plasminogen activator inhibitor-1 secretion in hypoxic corneal epithelial cells is associated with increased urokinase plasminogen activator activity

Vladimir Varlen Bamm, Vladimir Abraham Tsemakhovich and Nurith Shaklai 349 Oxidation of low-density lipoprotein by hemoglobin–hemichrome

Mariana Gavazza and Angel Catalá 359 Melatonin preserves arachidonic and docosapentaenoic acids during ascorbate-Fe^{2+} peroxidation of rat testis microsomes and mitochondria

Yuji Okatani, Akihiko Wakatsuki, Russel J. Reiter and Yasuyo Miyahara 367 Acutely administered melatonin restores hepatic mitochondrial physiology in old mice

Achilleas D. Theocharis, Demitrios H. Vynios, Nikoletta Papageorgakopoulou, Spyros S. Skandalis and Dimitrios A. Theocharis 376 Altered content composition and structure of glycosaminoglycans and proteoglycans in gastric carcinoma

Fan Wang, Xuan Wang, Yu Liu, Wei-Xi Tian and Hai-Meng Zhou 391 Inhibitive effect of zinc ion on fatty acid synthase from chicken liver

Announcement I The Prize Funds Rank

Number 4

Cells in focus

Charles W. Archer and Philippa Francis-West 401 The chondrocyte

Medicine in focus

Josep M. Argilés, Rodrigo Moore-Carrasco, Gemma Fuster, Sílvia Busquets and Francisco J. López-Soriano 405 Cancer cachexia: the molecular mechanisms

Molecules in focus

Gregorio Gomez and Michail V. Sitkovsky 410 Targeting G protein-coupled A2a adenosine receptors to engineer inflammation in vivo

Alfonso Pennelli, Paolo Sacchetta, Cesare Catitti, Fernanda Amicarelli and Carmine Di Ilio	415	Effects of glutathione on kinetics and structural properties of amphibian BbGSTP1-1
Review		
Mira Grdiša and Martyn K. White	422	Molecular and biochemical events during differentiation of the HD3 chicken erythroblastic cell line
General articles		
Fumiaki Watanabe, Ken-ichi Shinohara, Hirobumi Teraoka, Kenshi Komatsu, Kouichi Tatsumi, Fumio Suzuki, Takashi Imai, Masashi Sagara, Hideo Tsuji and Toshiaki Ogiu	432	Involvement of DNA-dependent protein kinase in down-regulation of cell cycle progression
Christian Wadsack, Birgit Hirschmugl, Astrid Hammer, Sanja Levak-Frank, Karen F. Kozarsky, Wolfgang Sattler and Ernst Malle	441	Scavenger receptor class B, type I on non-malignant and malignant human epithelial cells mediates cholesteryl ester-uptake from high density lipoproteins
Fa-Jian Hou, Hong Xu and Wang-Yi Liu	455	Simultaneous existence of cinnamomin (a type II RIP) and small amount of its free A- and B-chain in mature seeds of camphor tree
Michele Rechia Fighera, Juliana Sartori Bonini, Telma Grendene de Oliveira, Roberto Frussa-Filho, João Batista Teixeira Rocha, Carlos Severo Dutra-Filho, Maribel Antonello Rubin and Carlos Fernando Mello	465	GM1 ganglioside attenuates convulsions and thiobarbituric acid reactive substances production induced by the intrastriatal injection of methylmalonic acid
Masanori Matsuishi, Gun Saito, Akihiro Okitani and Hiromichi Kato	474	Purification and some properties of cathepsin H from rabbit skeletal muscle
Beatrice Arezzini, Benedetta Lunghi, Giuseppe Lungarella and Concetta Gardi	486	Iron overload enhances the development of experimental liver cirrhosis in mice
Merja Auvinen, Kristiina Järvinen, Anneli Hotti, Juha Okkeri, Jens Laitinen, Olli A. Jänne, Philip Coffino, Mathias Bergman, Leif C. Andersson, Kari Alitalo and Erkki Hölttä	496	Transcriptional regulation of the ornithine decarboxylase gene by c-Myc/Max/Mad network and retinoblastoma protein interacting with c-Myc
J.P. Mansell and A.J. Bailey	522	Increased metabolism of bone collagen in post-menopausal female osteoporotic femoral heads
Alexander D. Dergunov, Aline Hoy, Elizaveta A. Smirnova, Sophie Visvikis and Gerard Siest	530	Charge-based heterogeneity of human plasma lipoproteins at hypertriglyceridemia: capillary isotachophoresis study

Number 5

DIRECTED ISSUE: THE PROTEASOME IN THE REGULATION OF CELL FUNCTION

Editorials

Geoffrey J. Laurent 545 Editorial: Directed issue on proteasomes

Didier Attaix and Yves Briand 546 Editorial

Medicine in focus

Zongmin Li, Marlon Jansen, Sha-Ron Pierre and Maria E. Figueiredo-Pereira 547 Neurodegeneration: linking ubiquitin/proteasome pathway impairment with inflammation

Reviews

Noboru Mizushima, Tamotsu Yoshimori and Yoshinori Ohsumi 553 Role of the Apg12 conjugation system in mammalian autophagy

Geoffrey M. Goellner and Martin Rechsteiner 562 Are Huntington's and polyglutamine-based ataxias proteasome storage diseases?

Shigeo Murata, Tomoki Chiba and Keiji Tanaka 572 CHIP: a quality-control E3 ligase collaborating with molecular chaperones

Cezary Wójcik and George N. DeMartino 579 Intracellular localization of proteasomes

Simon S. Wing 590 Deubiquitinating enzymes—the importance of driving in reverse along the ubiquitin–proteasome pathway

Michael Groll and Robert Huber 606 Substrate access and processing by the 20S proteasome core particle

S. Russ Price 617 Increased transcription of ubiquitin–proteasome system components: molecular responses associated with muscle atrophy

Rasmus Hartmann-Petersen, Colin A.M. Semple, Chris P. Ponting, Klavs B. Hendil and Colin Gordon 629 UBA domain containing proteins in fission yeast

General articles

Lydie Suty, José Lequeu, Allan Lançon, Philippe Etienne, Anne-Sophie Petitot and Jean-Pierre Blein 637 Preferential induction of 20S proteasome subunits during elicitation of plant defense reactions: towards the characterization of "plant defense proteasomes"

Graciela Fuertes, Adoración Villarroya and Erwin Knecht 651 Role of proteasomes in the degradation of short-lived proteins in human fibroblasts under various growth conditions

Daniel Taillandier, Eveline Aurousseau, Lydie Combaret, Charles-Yannick Guezennec and Didier Attaix 665 Regulation of proteolysis during reloading of the unweighted soleus muscle

Lydie Combaret, Daniel Béchet, Agnès Claustre, Daniel Taillandier, Isabelle Richard and Didier Attaix 676 Down-regulation of genes in the lysosomal and ubiquitin-proteasome proteolytic pathways in calpain-3-deficient muscle

Mathew R. Hosler, Shuh-Tuan Wang-Su and B.J. Wagner 685 Targeted disruption of specific steps of the ubiquitin–proteasome pathway by oxidation in lens epithelial cells

Curtis J. Wray, Joshua M.V. Mammen, Dan D. Hershko and Per-Olof Hasselgren 698 Sepsis upregulates the gene expression of multiple ubiquitin ligases in skeletal muscle

Vered Maytal-Kivity, Elah Pick, Ron Piran, Kay Hofmann and Michael H. Glickman 706 The COP9 signalosome-like complex in *S. cerevisiae* and links to other PCI complexes

Kenneth J. Rodgers and Roger T. Dean 716 Assessment of proteasome activity in cell lysates and tissue homogenates using peptide substrates

Géraldine Carrard, Marc Dieu, Martine Raes, Olivier Toussaint and Bertrand Friguet 728 Impact of ageing on proteasome structure and function in human lymphocytes

Simone Merforth, Lothar Kuehn, Antonia Osmers and Burkhardt Dahlmann 740 Alteration of 20S proteasome-subtypes and proteasome activator PA28 in skeletal muscle of rat after induction of diabetes mellitus

Sophie Vigouroux, Luc Farout, Stephan Clavel, Yves Briand and Mariele Briand 749 Increased muscle proteasome activities in rats fed a polyunsaturated fatty acid supplemented diet

Number 6

DIRECTED ISSUE: RENIN–ANGIOTENSIN SYSTEMS: STATE OF THE ART

Editorials

G.J. Laurent 757 Editorial

Hugh Montgomery, Steve E. Humphries and Po Sing Leung 758 Renin–angiotensin systems: the new frontier

Review

A.H. Jan Danser 759 Local renin–angiotensin systems: the unanswered questions

Molecules in focus

David Coates 769 The angiotensin converting enzyme (ACE)

Walter G. Thomas and Frederick A.O. Mendelsohn 774 Angiotensin receptors: form and function and distribution

Guoyong Yin, Chen Yan and Bradford C. Berk 780 Angiotensin II signaling pathways mediated by tyrosine kinases

Duncan J. Campbell 784 The renin–angiotensin and the kallikrein–kinin systems

Beril Tom, Andreas Dendorfer and A.H. Jan Danser 792 Bradykinin, angiotensin-(1–7), and ACE inhibitors: how do they interact?

Medicine in focus

Saraswati Pokharel, Umesh C. Sharma and Yigal M. Pinto 802 Left ventricular hypertrophy: virtuous intentions, malign consequences

Reviews

Stefan Engeli, Petra Schling, Kerstin Gorzelniak, Michael Boschmann, Jürgen Janke, Gérard Ailhaud, Michèle Teboul, Florence Massiéra and Arya M. Sharma 807 The adipose-tissue renin–angiotensin–aldosterone system: role in the metabolic syndrome?

Matthias Barton, Renata Carmona, Jana Ortmann, José E. Krieger and Tobias Traupe 826 Obesity-associated activation of angiotensin and endothelin in the cardiovascular system

Po Sing Leung and Mark C. Chappell 838 A local pancreatic renin-angiotensin system: endocrine and exocrine roles

Po Sing Leung, Man Lung Fung and Michael S.C. Tam 847 Renin–angiotensin system in the carotid body

Alun Jones and David R. Woods 855 Skeletal muscle RAS and exercise performance

Ibrahim C. Haznedaroglu and M. Akif Öztürk 867 Towards the understanding of the local hematopoietic bone marrow renin-angiotensin system

Yusuke Suzuki, Marta Ruiz-Ortega, Oscar Lorenzo, Monica Ruperez, Vanesa Esteban and Jesus Egido 881 Inflammation and angiotensin II

M.J. McKinley, A.L. Albiston, A.M. Allen, M.L. Mathai, C.N. May, R.M. McAllen, B.J. Oldfield, F.A.O. Mendelsohn and S.Y. Chai 901 The brain renin–angiotensin system: location and physiological roles

Yao Sun and Karl T. Weber 919 RAS and connective tissue in the heart

Jop H. van Berlo and Yigal M. Pinto 932 Polymorphisms in the RAS and cardiac function

General articles

Siu Po Ip, Pui Chun Kwan, Carvell H. Williams, Susan Pang, Nigel M. Hooper and Po Sing Leung 944 Changes of angiotensin-converting enzyme activity in the pancreas of chronic hypoxia and acute pancreatitis

Stephan R. Holmer, Heike Bickeböller, Christian Hengstenberg, Friederike Rohlmann, Susanne Engel, Hannelore Löwel, Björn Mayer, Jeannette Erdmann, Christian Baier, Gernot Klein, Günter A.J. Riegger and Heribert Schunkert 955 Angiotensin converting enzyme gene polymorphism and myocardial infarction a large association and linkage study

Christiane Pees, Thomas Unger and Peter Gohlke 963 Effect of angiotensin AT_2 receptor stimulation on vascular cyclic GMP production in normotensive Wistar Kyoto rats

Maurice E. Fabiani, David J. Hawkes, Albert G. Frauman, Chris Tikellis, Colin I. Johnston and Jennifer L. Wilkinson-Berka 973 Regulation of angiotensin II receptors in the prostate of the transgenic (mRen-2)27 rat: effect of angiotensin-converting enzyme inhibition

Marilyn Mielke, David J. Paterson, A. Elizabeth Sang, George K. Radda and Kieran Clarke 984 The mechanism underlying the positive inotropic effect of angiotensin II in the isolated perfused rabbit heart: a ^{31}P NMR study

Balázs Mihalik, Zsuzsanna Gáborik, Péter Várnai, Adrian J.L. Clark, Kevin J. Catt and László Hunyady 992 Endocytosis of the AT_{1A} angiotensin receptor is independent of ubiquitylation of its cytoplasmic serine/threonine-rich region

Number 7
